The screenshot shows the website's header with the logo, a 50th Anniversary badge (1958-2008), and navigation links: About Us, Products, News, Contact, Resources, Business Partner Login. A search bar is located in the top right corner.

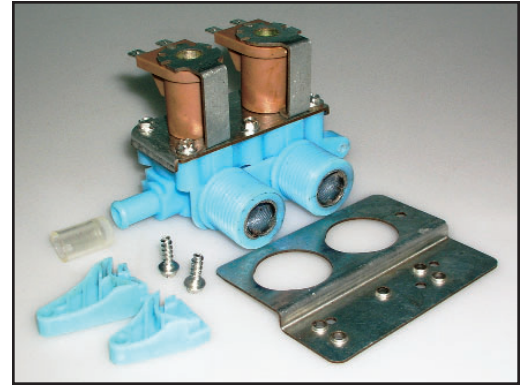

The main content area features a large image of industrial machinery and a 'Welcome!' message. Below the message is a list of products including Power Transmission Belts, Neoprene Synchronous Vee Belts & Belting, Tiger High Horsepower Synchronous Belts, Accu-Link Adjustable V-Belts, Urethane Power Transmission Belts, Uniflex Belts, Open End Belts, Polyurethane Timing Belts, Timing Pulleys, Flexion Belt Drives, Pulleys, Sheaves & Bushings, Industrial Hose, Industrial Couplings, and Skirtboard Rubber.

A 'QUICK NAVIGATION' sidebar on the right contains links for About Us, Products, News Headlines, and Contact. At the bottom, there is a 'Sign Up To News Mailing List' form with fields for First Name, Last Name, and a Go! button.

## WV-1\*

**The Most Universal  
Washing Machine Water  
Valve In the Industry!**

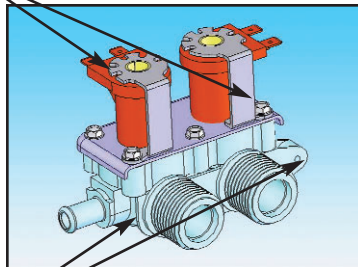

- Fits both old and new style valves.
- Replaces over 39 valves with one part!
- Replaces multiple OEM's.

Rotating solenoid brackets allow you to position the solenoid to where you need them.

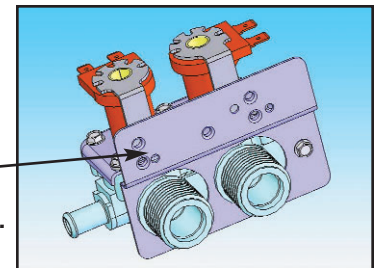

Mounting screw and grooves, allows valve to easily install into newer machines.

Screw on mounting tabs adapts valve to fit G.E. applications.

Screw on bracket with multiple mounting holes, fits most older style valves.

# LAUNDRY BELTS TYPES & IDENTIFICATION

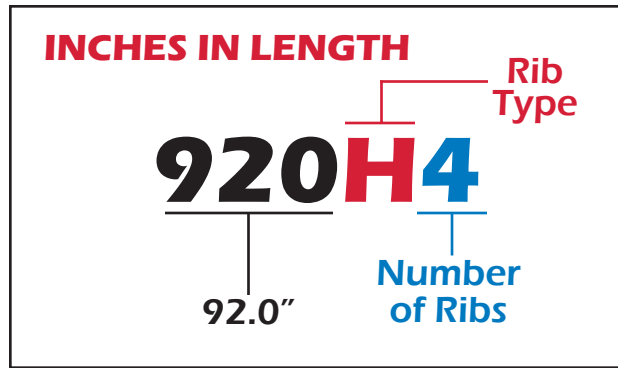

## POLY-V DRYER BELTS

Used in most clothes dryers, Poly-V belts offer gripping power and tracking ability at longer lengths to fit around the drum. A Poly-V belt is capable of running on small pulleys and can withstand backside tensioning or idler.

- **Length** - Measure the outside diameter of the belt. This is best done with a flexible tape measure or belt measuring tool.
- **Identify the Rib Type** - Dryer belts are generally "H" or "J" rib Poly-V belts.

<b>"H" Rib</b>	-	<b>A - 3/25"</b>
		<b>B - 1/16"</b>
<hr/>		
<b>"J" Rib</b>	-	<b>A - 5/32"</b>
		<b>B - 3/32"</b>

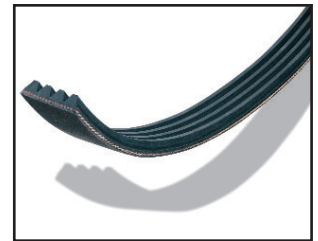

- **Count the Ribs**
- **Use Jason size cross-reference to determine the proper belt**

## POLY-V FLEXONIC® BELTS

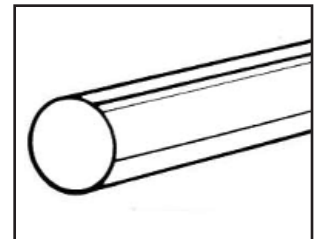

Used primarily on front load washing machines, these special Poly-V belts are designed specific to the machine. A Flexonic® belt is stretched over the pulleys during installation and actually contracts while operating, eliminating the need for idler pulleys or tensioning.

Use only belts specified for the machine.

## ROUND BELTS

Used primarily on older dryers and Maytag Dishwashers, round belts are a Urethane material, sized and specifically matched to the machine.

## FLAT BELTS

Flat belts are used due to their flexibility on small diameter pulleys and ability for a backside idler. The flat surface area gives excellent horsepower transfer on large surfaces like a dryer drum.

Electrolux 5303281154 is the industry's only flat belt.

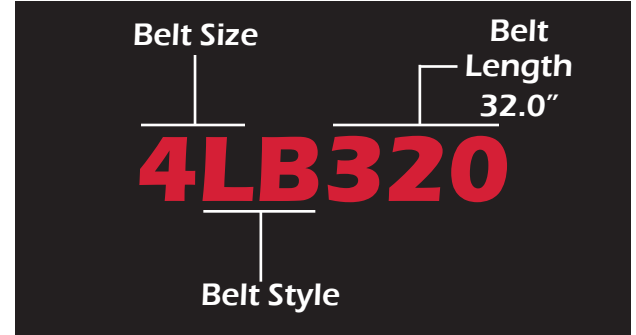

\*Flexonic is a registered trademark of Hutchinson.

# IDENTIFYING WASHING MACHINE V-BELTS

**NOTE:** Most washing machine belts are custom designed to the machine. Several belts like 95405 and 2-11125 require special sizes. In addition, several belts are custom designed to run on back side idler pulleys or are designed to slip, allowing ramp up (use as a clutch). Due to this, obtaining the product model number or belt part number is the preferred method of identification.

Some commercial machines use standard V belts - use the Jason cross-reference guide to identify these belts.

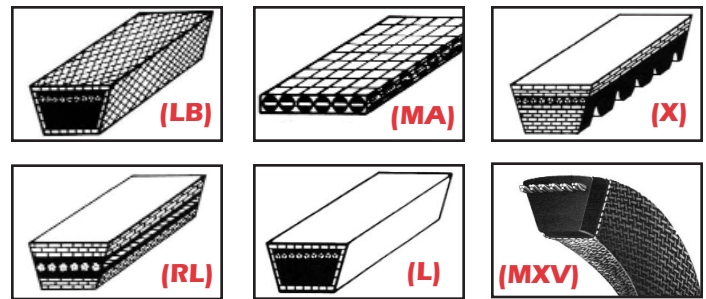

## PART NUMBER SYSTEM

### 1. Identify the brand of the appliance.

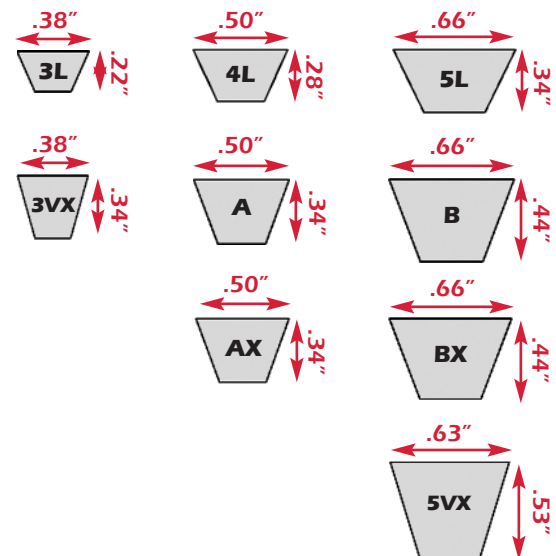

### 2. Identify the belt style:

- LB - Bareback
- L - Wrapped
- MA - Flexonic (flat) with metric sizes
- MXV - Clutching
- SPZ - Metric size
- X - Cogged
- RL - Laminated

### 3. Identify the belt size:

- 3VX - used on commercial laundry
- 5VX - used on commercial laundry
- 4L - used on commercial & domestic laundry
- A - used on commercial laundry
- 5L - used on commercial laundry
- B - used on commercial laundry
- AX - Cogged belt used on commercial laundry
- BX - Cogged belt used on commercial laundry

### 4. Measure length using a flexible tape measure or belt measuring tool:

- A & B belts are measured from the inside diameter
- 4L & 5L belts are measured from the inside diameter
